

Structure of the tagging system

Structure of the component tagging

301.TA.NON.1: where 301 = Digester (System number), TA = Tank (Equipment), NON = Mechanical object (No switchboard), 01 = Tank nr 1.
201.P.CSB2.05: where 201 = Manure/feeding (System number), P = Pump (Equipment), CSB2 = Electrical object (Distribution board), 05 = Pump nr 5.
901.AK.CSB1.03: where 901 = Control and automation (System number), AK = Sub-distribution board at subcontractor (Equipment), CSB1 = Electrical object (Distribution board), 03 = Cabinet nr 3.

Nature Gas		0,255,127	NG
Instrument Leader		Green	N/A

Structure of the pipeline tagging system

The pipetag consists of various information about the pipe
Full pipeline tag as shown below

Example

Two (2) digits. Starts with 01
[01]

- Two (2) to four (4) characters (letters)
- [LM - Liquid manure]

Three (3) digits
[201 - Manure feeding in tank 1]

Pipe Spec name
[PE17 - PE100 SDR17]

Pipe size
DN indication for Metric pipes
OD indication for PE-pipe
[This example is OD 100 mm]

The pipe tag will be shown on the P&ID as follows: PipeSpec-Size
Area-Service-Serialnumber

Example of line tag notation on P&ID: PE17-110
201-LM-01

Line color corresponding to table above.
The part below the pipeline is the Unique Line Tag.
Unique Line Tag is generated automatically when creating complete Line Tag.
Unique Line Tag is used by the P3D system when designing pipes in the 3D model and when generating Isometrics.
